

Welcome to fourth grade! This will be a year to review many things you have already learned such as subjects, verbs, multiplication, as well as many scientific and historical topics. We will extend these basic skills with things such as prepositions, equivalent fractions, state capitals, and the circulatory system just to name a few. I hope it will be a great year of learning and fun!

Fourth grade is the perfect grade to teach because the students are old enough to know the basic rules of school and yet still young enough to want to please their teacher! Students will be expected to try their best to be good listeners who respect authority and each other.

Again, welcome to fourth grade. Let's work together to have a positive and productive year of learning and growth. Have a wonderful summer!

Fourth Grade Supply List
